GUSTAVO MONNERAT DA COSTA VERONESE

SOFTWARE DEVELOPER | FULL STACK • AUTOMATION

Curitiba, PR, Brazil • +55 (41) 99189-2192 • monnerat.gustavo@outlook.com
Portfolio: gusmonnerat.dev • GitHub: gustavommcv • LinkedIn: gustavommcv

PROFILE

Software developer with a technology degree in Systems Analysis and Development, a postgraduate qualification in Software Architecture and Solutions, and an Electrical Engineering degree in progress. Freelance experience delivering a web application to production and maintaining open-source software. Interested in software engineering, automation, testing, and AI-assisted development.

PROFESSIONAL EXPERIENCE

Freelance Full Stack Developer | Veronese Maquetes

Apr 2025 – present

- End-to-end development of a commercial web application, with responsive Angular interfaces and Go back-end services.
- Deployment and configuration of services on AWS Lambda and the front end on Vercel; requirements follow-up and post-deployment changes.
- Interface design and prototyping in Figma, focusing on usability, visual identity, and business needs.

OPEN SOURCE PROJECT

Manga2Ink | Development and maintenance | Repository

2026 – present

- Development of a desktop application with Electron, React, and TypeScript to organize and convert manga into digital volumes (EPUB, CBZ, and PDF).
- Feature development, integration of processing components, architecture review, bug investigation, and refactoring.
- Automated tests, builds, and cross-platform releases with GitHub Actions; project documentation and maintenance.

ADDITIONAL EXPERIENCE

2D/3D CAD Modeler | Veronese Maquetes

Jan 2026 – present

- 2D CAD modeling for cutting machines and 3D part modeling for 3D printing, including preparation and adjustment of manufacturing files.
- Work at Veronese Maquetes and occasional modeling assignments for Projecta Maquetes.

EDUCATION

Electrical Engineering (bachelor's degree), in progress — Cruzeiro do Sul | 2026–2031 (expected)

Postgraduate qualification in Software Architecture and Solutions — XP Educação | 2026

Technology degree in Systems Analysis and Development — Unicesumar | 2024

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Go, C#, and Java

Frameworks and platforms: Angular, React, Electron, ASP.NET, and Spring Boot

Data and infrastructure: PostgreSQL, MySQL/MariaDB, MongoDB, AWS Lambda, Vercel, and Linux

Practices and tools: Git, GitHub, CI/CD, GitHub Actions, automated testing, Figma, and AI development tools (Claude Code and Codex)

LANGUAGES

Portuguese — native • **English** — advanced (C1), certified by Senac
